deposit	returned when moving out
commute to school	10 minutes by public bus 20 minutes by bicycle

※International students may be assigned to another dormitory depending on the number of students.

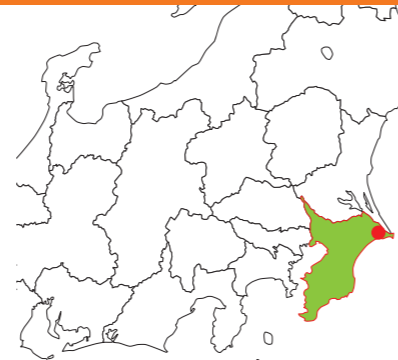

Equipment (Refrigerator, washing machine, desk, chair, bed, Wi-Fi)

Dormitory

What kind of city is "Choshi" where Chiba Institute of Science is located?

From Narita airport to Choshi station, it takes one and a half hours by train. Facing the Pacific Ocean and having the biggest river in Japan (Tonegawa river) in the north side of the city, Choshi is blessed with a natural environment. The city ranks as the place of the biggest landing of fish in Japan, and is also famous for soy sauce production. Affected by black current, its oceanic climate is mild and humid throughout the year, and rarely snows in winter. It has numerous places where people can experience the history of the earth, including a 200 million old stratum; the whole city of Choshi being certified as a Geopark. A magnificent view of the Pacific Ocean spreads in front of the CIS campus. The 40 meters high sheer precipice "Byoubugaura" (National Site of Scenic Beauty) stretches into the ocean where you can experience the impressive sight of it being dyed by the flaming sunset.

Chiba Institute of Science Intensive Japanese Language Program

We are now studying Japanese

Pursue your dream in the Intensive Japanese Language Program

In the Intensive Japanese Language Program, students will acquire strong Japanese language skills necessary to study at university. Students not only study but experience productive campus lives as they participate in circle activities or festivals with undergraduate students. Students of IJLP become members of Choshi International & Multicultural Association (CIMA), and have opportunities to participate in events and volunteer activities organized by CIMA. When students complete IJLP, instructors of the program will support students, finding their best academic path by carefully listening to their preference. Students of the Japanese language and culture course proceed to CIS and other affiliate universities, and students of the Automobile Course aim to enroll in a school to become automobile technicians. If students proceed to CIS, they can consult Japanese teachers of the program throughout their student life. We fully support students to make their dreams come true.

Features of IJLP

- Students can participate in a variety of Japanese culture experiences offered by the Choshi International & Multicultural Association.
 - Online tea party via ZOOM.
 - Exchange activities with a wide range of local people including students of elementary school and Chiba Shogaidagakko who are students over 65 years old.
 - Excursions (tsunami evacuation drill), walking event of Choshi city (confirmation of evacuation shelter).
 - Events including Cherry blossom 'Hanami', Tanabata, Kakizome, New year shrine visit, Tea ceremony.
- The program supports students in many aspects such as part-time work, health insurance, pension plan and tax return.
- On campus, students can participate in extracurricular activities, volunteer activities and campus festivals with undergraduate students.
- There is "Homeroom" where international students can consult with instructors.
- If entering CIS, students can receive continuous support up to graduation.
- A typical path is advancing from N3 to N2 then N1 of JLPT, acquiring a scholarship and finding permanent employment.
- International students are allowed to be involved in activities outside of their Certificate of Eligibility (part-time work) for 28 hours per week. It is 40 hours a week for long vacations including spring, summer and winter break.

Period of study and limit of enrollment

- Japanese language and culture: 1 year (Kake academic advancement course)
 - Automobile mechanic course: 1 year
- Total: 40
- ※ For September admission (1.5 year), contact Admission Office for details.

Information Science (A,B,C,D)	2 ea
General Studies (A,B,C,D)	4 ea

International Student from China

2nd year student in the Graduate School of Risk Management, Risk Management Chiba Institute of Science

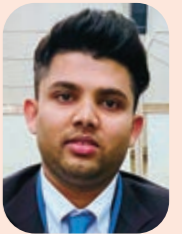

ZHANG CHENGSHENG

Entering IJLP of Chiba Institute of Science gave me opportunities, not only to experience the joy of learning but also had me motivated to enter Chiba Institute of Science. Thanks to instructors of IJLP, I learned a lot about Japanese language, culture and many other things. I intend to find a job in Japan, using my experience at CIS. With support from many teachers I passed the entrance examination to the graduate program. I can't thank the teachers enough.

International Student from Sri Lanka

Graduated in March 2022 Faculty of Risk and Crisis Management Department of Risk and Crisis Management for Aviation Technology Chiba Institute of Science

BANDARANAYAKE SHOHAN MERVIN DIAS

The 2 years I studied in IJLP was the best experience in my life so far. By actually living in Japan, I was able to understand different cultures by interacting with Japanese people and students from other countries. I was able to improve my language skills thanks to my teachers' instructions which gave me confidence. At Chiba Institute of Science where I entered after IJLP, I studied aviation technology, and received a scholarship. I appreciate their encouragement.
